AC Line Protectors

Most modern electronic equipment devices are subject to interference from electromagnetic signals and noise entering via AC line power cords. DVD and Video cassette recorders, television sets, consumer audio gear and many telecommunications products are now being constructed with transformerless power supply technology, making each piece more sensitive than ever to line variations and interference. AC line filters offer an inexpensive alternative to the risk and unpleasantness of dealing with many types of line problems. MMI's line filters are a complete package of inductive isolation, over voltage control, capacitive decoupling, and interference control of both common mode and differential mode signals across a broad frequency spectrum range. Several models offer currents to 20 Amps and up to 6 plug-in outlets.

Filters are constructed in a tough, single piece heavy chassis measuring 4' square, and each includes 6 foot molded line cord, fuse (replaced if necessary from the outside), and stainless steel ground terminal.

All are designed for flat surface mounting and may be used with or without ground terminal connection. Performance improves if local ground connection can be made and if distance from filter body to ground is kept short. Each unit is packed with an informative owner's manual and an extra fuse.

** Looking for the M-471, AC Line/appliance filter? To eliminate RF that is causing problems with a noisy appliance? [Look here.](#)

Models Available:

M-474-3, 120VAC, 50/60 HZ, 15 amp, 3 outlets with ground, 3 prong cord.

M-476-3, 120VAC, 50/60 HZ, 20 amp, 3 outlets with ground, 3 prong cord.

NOTE: M-476 uses a plug with one prong horizontal, and requires pictured outlet type.

Price:

\$105.00

\$116.00
